

Improving Patient Safety

With new innovations in print technology

Your customer communications experts.

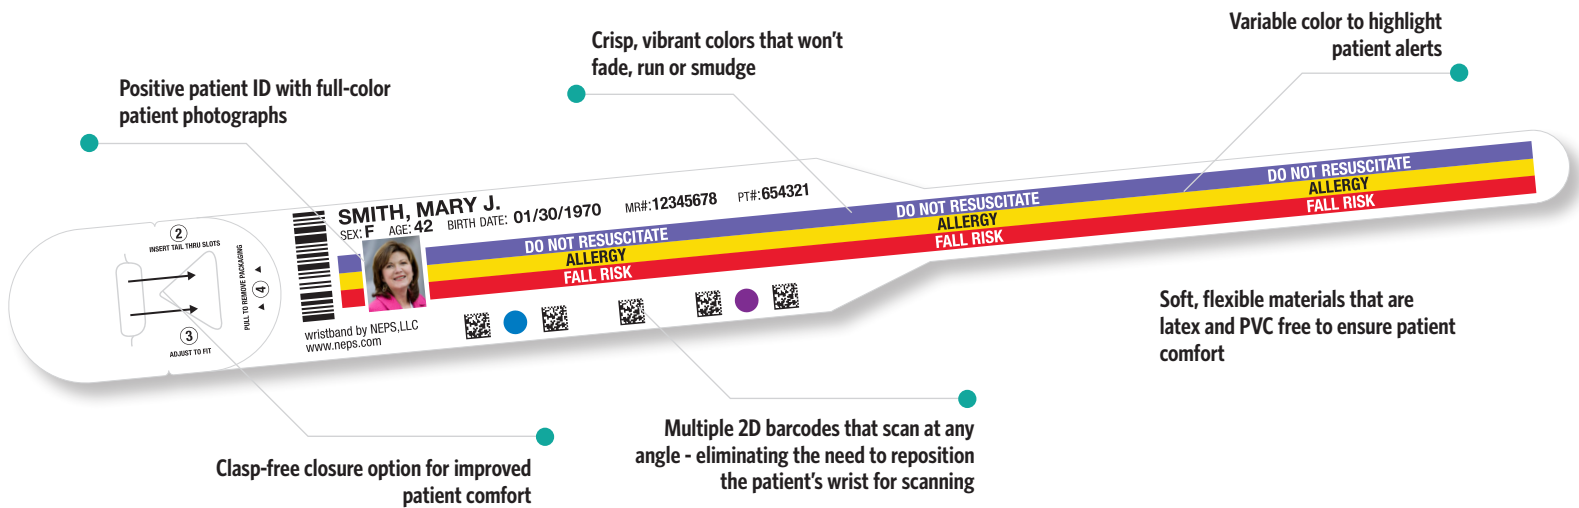

Reduce errors while lowering costs and improving efficiencies

NEPS provides a fast and cost-effective way to improve patient safety and reduce operating risks by employing the latest innovations in patient wristbands as well as pharmacy, lab, and dietary labels all in one suite — Health e-Connect™

Admissions

Ensuring patient safety starts at the point of admission. With best practices in information design and new technologies in dynamic on-demand color printing, you can improve patient safety, while lowering costs and improving efficiencies.

Seamless integration with your HIT systems to leverage your existing investments and generate a faster ROI.

Reliable print technologies designed to support real-world applications that demand fast, trouble-free processing.

Packaging and Labeling issues were cited as the primary cause of

33%
of medication errors

Pharmacy

Knowing the right drugs for the right patient at the right time is key to reducing medication errors. Dynamic, variable color printing paired with best practices in information design, you can highlight patient alerts and other critical information to ensure your patients are safe.

Indicators for pediatric patients

Highlight critical information

Reinforce alerts & warnings

Colorfast, smudge proof labels

RCRA U **KEEP REFRIGERATED**

Quick & simple implementations that don't require end-user training, as our systems run automatically in the background.

Automated highlighting of critical information in the required color, reducing errors associated with manual intervention.

Proven Results

Whether your needs are as straightforward as implementing color or 2D Barcode systems, or as far reaching and complex as ensuring the Five Patients Rights or addressing meaningful use of EHR systems, NEPS provides the expertise and technology solutions to support your specific requirements.

With more than 20 years of healthcare industry expertise, we provide an unmatched blend of innovative technology solutions, information design principles, and print systems expertise that enables healthcare organizations to effectively address their most challenging demands of patient safety.
