# pt.ID

*An affordable, turn-key solution that ensures Positive Patient ID*

**NEPS**

# Ensuring patient safety starts at the point of admission

**Pt.ID** is a "plug and play" wristband solution from NEPS. Everything you need to print patient wristbands, the printer, the bands, ink, network connection and support is included in one low monthly price.

Preventable medical errors are one of the leading causes of death in the United States, and healthcare professionals unanimously agree Positive Patient Identification is worth the time, effort and expense.

## Here's a quick survey you can ask yourself

- How often do we "re-band" because our bands just don't last?
- What's the read rate of our barcode scans on our wristbands?
- How would our patients rate the comfort of the wristbands?
- How "user friendly" are our wristbands to the healthcare professionals that need to read them?
- Do our wristbands provide easy-to-spot visual cues that easily identify patient risks such as allergies, MRSA, and Fall Risks?
- Do we have the most cost-effective wristband solution for our facility's unique services?

If any of these questions leave you feeling like there's room for improvement, chances are good that NEPS can help.

NEPS offers low-cost, leading edge color printing technologies that eliminate manual processes, improve patient safety and enhance the patient experience.

Seamless integration with your HIT systems to leverage your existing investments

Automated highlighting of critical information in the required color.

Reliable print technologies that provide fast, trouble-free processing.

Quick & simple implementations that don't require end-user training
