

# Health eConnect

MOBILE

**Speed. Safety. Confidentiality.**  
*Mobile solutions for critical patient documentation.*

## When every second counts, don't waste precious time searching for paper forms.

Eliminating paper-based processes accelerates patient registration and improves accuracy. Health eConnect Mobile enables both patients and hospital personnel to enjoy the simplicity and convenience of communicating and capturing critical patient data on mobile devices: smartphones, tablets, or laptop computers.

### Eliminate the Paper Chase

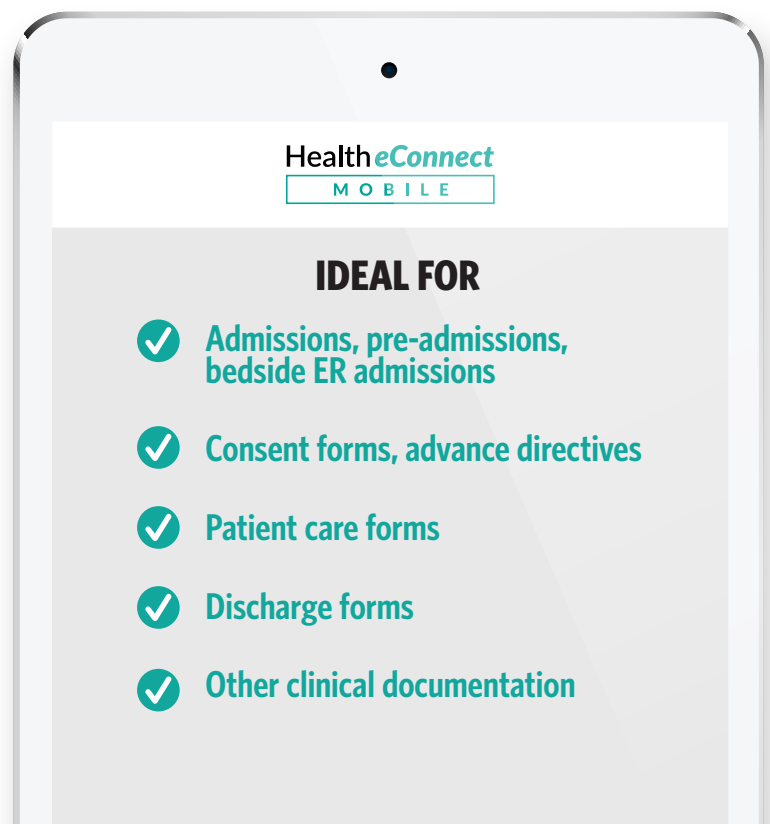

With a direct, real-time feed to the EMR system, Health eConnect Mobile eliminates manual data entry and mis-filings associated with paper-based systems.

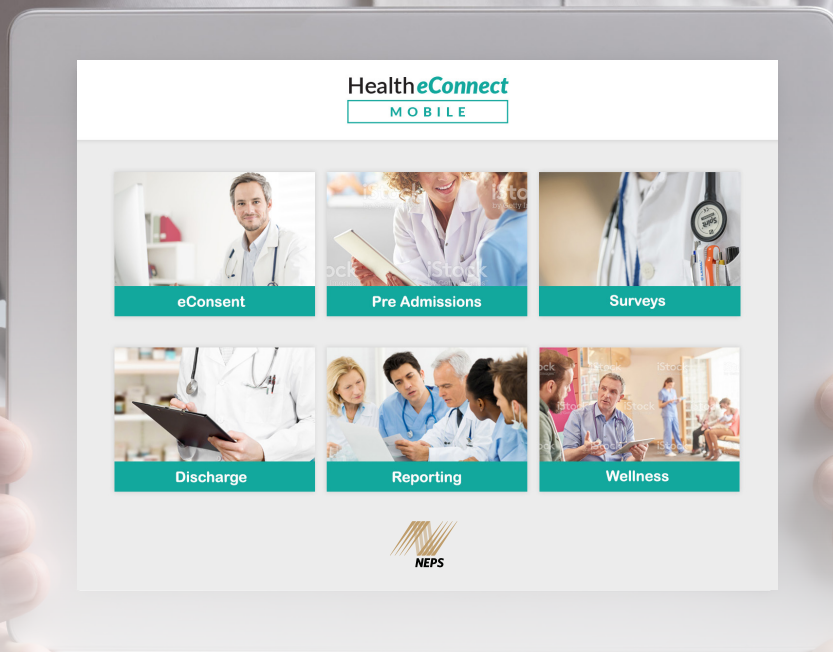

### Improve the Patient Experience

Streamlining the admissions process with mobile technologies is more secure and more convenient than traditional workflows and enhances the hospital's image.

### Reduce Risk

Ensure HIPAA and JCAHO compliance while providing more efficient and expeditious patient care.

### Secure Access

Safeguard Protected Health Information with a closed-loop system allowing for a secure, electronic audit.

### Device Independent

Engage with patients through preferred method of communication: smartphone, tablet, or desktop computer.

### Automated

Automate the feed of documents into EMR without manual intervention, and route documents electronically.

### User Experience

Capture critical patient data efficiently, through a simple and intuitive user interface.

### Electronic Signatures

Improve efficiency and improve experience by allowing patients to sign documents digitally.

### Lower Costs

Eliminate the expense associated with creating, managing and shredding paper forms.

## Part of the Health eConnect family

- ✔ Improve patient safety
- ✔ Secure Protected Health Information (PHI)
- ✔ Increase operational efficiency
- ✔ Reduce labor costs
- ✔ Increase patient satisfaction
- ✔ Streamline admissions

*Improving patient safety for over 25 years*
